

Case Description: Co-Creation in Gaia, Portugal

The GAIA Tiny Forests project focuses on developing local cases in the Perosinho and D. Manuel Clemente neighbourhoods in the district of Porto. It aims to build on strengths such as community involvement and address weaknesses such as the lack of a strategic biodiversity plan in these two neighbourhoods.

Opportunities lie in the political interest and collaboration with the company Gaiurb, the municipality of Vila Nova de Gaia and the involvement of the local community. The project includes strategic planning, local interventions and initiatives to raise awareness and promote urban biodiversity.

Perosinho

D. Manuel Clemente
